

DOUBLE BASE REACTIVE POWDER PRTF 196

PRTF 196 is used to equip the motor of the anti-hail rocket, used to prevent hailstones formation in clouds by triggering rainfall.

1. Characteristics:

Dimensions, (in mm):

| | |
|---------------------|---------|
| - Length | 315 ± 1 |
| - Outer diameter | 64-1.5 |
| - Inner diameter | 13+1 |
| - Diameter over rib | 68-1.5 |

Mass, kg 1.55 ± 0.05

Density, g/cm³ min. 1.57

Calorific power, kcal/g 850 ± 8

Humidity, % max. 0.7

Vielle chemical stability at 106.5 °C with litmus paper:

| | |
|------------------------|---------|
| - Simple test, hours | min. 7 |
| - Repeated test, hours | min. 65 |

2. Packing:

Each piece is packed in acid-free paper then overpacked in metallic containers and wooden boxes (for long-term storage).

3. Guarantee:

10 years from manufacturing date.
