

DETOROC

1. **Destination:** DETOROC is used for rock splitting in quarries, in underground mining works, civil engineering, blasting works (in humid or underwater environments).

2. Technical characteristics

	Types			
	0.6	1	2	5
Explosive weight, kg	0.6±0.1	1±0.15	2±0.25	5±0.3
The priming channel diameter, mm	7.5 ± 0.5			
Pentrite weight, g	7.5 ± 0.3			
Length of the priming channel, mm, min.	the filling hole diameter			
Diameter, mm				
- diameter D1	60	60	70	60
- diameter D2	95	110	115	170
- diameter D3	114	150	180	255
Height, mm	30	30	30	90
